

DWS(Automatic Parcel Dimension / Weight / Scan Equipment)

/ Advantages and features

- High automation, few labor consumption; automatically weighing, dimensioning, barcode scanning, documenting and submitting the data
- High efficiency, the maximum speed is up to 50pcs/minute
- Barcode high recognition rate, high measurement accuracy, fast collection and integration, large overall flow
- Seamless converted with the WMS, because the acquired data can be documented or submitted at any pointed location and DWS software can be imbedded inside the express software.
- The afterward sorter and chute are optional and mature
- Easy installation, simple operation, cheap maintenance, stable function.

/ Parameters

Power supply	AC220V, single phase, 50-60Hz
Weight range	0.1~60kg
Weight accuracy	±50g
Dimension range	(L*W*H): 1000*900*700mm~100*100*100mm
Dimension accuracy	±10mm
Speed	Liner speed 1-1.5meters/second
Barcode density	0.3mm or 12mil
Barcode location	on top of the parcel
Barcode types	1D code: Code 39, Code 128, Code 93, ITF25, CodaBar, EAN8, EAN13, UPCA, UPCE, etc; 2D code: QR, DM, etc

/ Work Flow
